

EDGELESS MOP SYSTEM

Non-sterile – ISO Class 4+ Environments

LYNBOND

About

The Edgeless Mop System is designed for maintaining specific levels of cleanliness in controlled environments and cleanrooms. Supplied as a complete set of mop head, frame and handle, the system is intended for floor cleaning in cleanrooms and controlled environments. The stainless steel handle is electrostatic dissipative and has an adjustable height for improved ergonomics. The mop head has low linting and is washable for re-use.

Specification

- Compatibility: ISO Class 4+ cleanrooms
- Mop head: 600 mm
- Frame: 170 mm
- Handle: 850 to 1,500 mm (adjustable)
- Microfibre / Polyester mop head
- Polypropylene frame
- Stainless steel / Polypropylene handle, electrostatic dissipative
- Can be sterilised by autoclave (Max. 124°C) or gamma ray at 25 kGy
- White (mop head), grey (frame)
- Supplied as a set: mop head, frame, handle

Features

- Suitable for ISO Class 4+ cleanrooms
- Low linting
- Washable for re-use
- Electrostatic dissipative stainless steel handle
- Adjustable handle for improved ergonomics
- Can be autoclaved or gamma sterilised

Application

- ISO Class 4+ Cleanrooms
- Semiconductor & Microelectronics Manufacturing
- Floor cleaning
