

FLAT MOP SYSTEM

Stainless Steel Frame & Handle with
Microfibre Mop Head

LYNBOND

About

The Flat Mop System is designed for maintaining specific levels of cleanliness in controlled environments. The stainless steel frame and handle are electrostatic dissipative. Stainless steel handle adjusts from 850mm to 1500mm for improved ergonomics. The low particulate microfibre mop head is laundered and prepared in an ISO Class 4 cleanroom and is compatible with ISO Class 4+ environments. Supplied complete with handle, frame and mop head.

Specification

- Mop head laundered and prepared in an ISO Class 4 cleanroom
- Mop head: 115 x 405mm, Microfibre / Polyester
- Frame: 100 x 400mm, Stainless steel, electrostatic dissipative
- Handle: 850 - 1500mm, Stainless steel / PP, electrostatic dissipative
- Please note: the end grip is non-ESD
- Sterilisable: Autoclave (Max.124°C) or gamma ray

Features

- Superb absorbency
- Low linting
- Strong chemical, disinfectant and detergent resistance
- Electrostatic dissipative frame and handle
- Washable for re-use

Application

- Cleanrooms & controlled environments
- Semiconductor & Microelectronics Manufacturing
