Conductive Fingertip Touchscreen Glove Liner

Touchscreen Compatible

About

Touchscreen Glove Liners are knitted from a mix of nylon & cotton with conductive yarn on three fingertips, allowing touchscreens and handheld devices to be operated without removing the glove. The nylon and cotton construction gives comfort and sweat absorption during extended wear, and the liner can be worn underneath an outer glove. Colour coded cuffs allow sizes to be identified at a glance.

Features

- Designed to be worn as a liner under a single use glove
- Conductive yarn on three fingertips for touchscreen use
- Compatible with capacitive touchscreens including phones, tablets and handheld devices
- Fingertip surface resistance: <1.0 x 10^5 Ω
- Material: 50% nylon, 45% cotton, 5% conductive yarn
- Comfort and sweat absorption
- Colour coded cuff for size identification
- Available in Small, Medium, Large and XL
